# Crew Rest Seat/Bunk for Indian registered Aircraft

Expleo offers a crew rest solution including curtain which can be easily installed during flight on existing economy seats in only minutes.

It provides a full flat sleeping surface when installed on an existing standard triple or quadruple seat row. It potentially enables the extension of the flight duty period according to DGCA India civil aviation requirements, section 7 Part III.

This is an ideal solution for single class cabin layouts. The switch between Crew Rest and Full PAX operations can be done in minutes. The entire unit can be stowed in the overhead bin or in a customized bag, buckled on a seat using a seat belt extension.
